

The Halsey Taylor Voyager™ Water Cooler is now available with **PERSONALIZED MOLDED-IN GRAPHICS!**

THE REVOLUTIONARY VOYAGER™ JUST GOT BETTER!

When does a water cooler do more than provide a refreshing drink? When it's a Halsey Taylor Voyager™ water cooler! That's because Voyager™ is now available with personalized molded-in graphics.

From company logos and team emblems, to advertisements and public service announcements, Voyager™ is truly a unique communications tool. The *polycarbonate graphics can be one, two or four colors* and are molded into Voyager's top panel for a lasting result. The cooler top can be easily removed and replaced, allowing for messages, advertisements and designs to be rotated or changed with little effort. And Voyager's ultra modern, hi-tech appearance naturally enhances any graphics.

Graphic tops are furnished separate from the water cooler and require a **minimum order of 20 pieces**. To learn more about this truly different and effective way to get a message across to a variety of audiences, talk to a Halsey Taylor Representative today. The possibilities are endless!

SCHOOLS AND EDUCATIONAL FACILITIES

Whether promoting school spirit or driving home an important message to students, the Voyager™ water cooler is a truly **unique communications tool and message center** for educational facilities. Team names and insignias look great on Voyager's neutral molded finish. And Voyager's durable, *vandal-resistant construction* combines with the safety of rounded corners and smooth edges to make it an ideal choice for schools. Shown here is the Voyager™ HTV8BL-Q Bi-Level model featuring an *ADA compliant* unit on the right side and a second water cooler for the general public on the left side.

RETAIL STORES AND SHOPPING MALLS

The retail setting provides yet another opportunity for the Voyager™ water cooler. Here, the top panel can be an **effective advertising medium** for specific brands available at the store. What better way to promote a brand name, or a particular product, than right in the store where it is available! As with other forms of advertising, graphics on the Voyager's top panel can be sold as advertising space to suppliers, allowing for an additional source of revenue for *retail businesses, shopping malls, airport terminals and other high-traffic locations.*

STADIUMS AND AUDITORIUMS

Sports stadiums, civic centers and auditoriums are also great locations for the Voyager™ water cooler. Professional and collegiate sports teams can customize their coolers with **team logos** and graphics. These venues are also ideal for *public service type messages*. And, as with retail settings, Voyager™ tops can be utilized as advertising space for team sponsors, national companies and local businesses. Because the tops can be easily changed, space can be offered for a month, or for a year. And because graphics are molded into the cooler's top, you know they are going to stand-up... and stand out!
